

### The Conference

The International Conference on Feature Interactions in Telecommunications and Software Systems (ICFI) has evolved out of the Feature Interaction Workshop, which has been the primary international forum for discussion and reporting on research in the feature interaction problem in telecommunications and software systems since 1992.

### Programme

There are four keynote speakers, selected for their contributions to fields that are related to but outside feature interaction:

- Glenn Bruns
- H.-Arno Jacobson
- Morris Sloman
- Perdita Stevens

In addition, the conference will feature 14 full and 6 short papers as well as posters and panel sessions.

### Conference Location

The Conference is organised by the University of Leicester and the University of Birmingham, and will be located at the University of Leicester.

Leicester lies at the heart of England close to major motorways, and a short distance from Nottingham East Midlands Airport. Leicester railway station is a ten minute walk to the University. The campus is compact - set within attractive green spaces. ICFI'05 will take place on the University's campus.

### Contacts

All questions should be sent to:  
fiw05@mcs.le.ac.uk

### Co-Chairs

**Mark Ryan**  
School of Computer Science  
University of Birmingham  
Birmingham B15 2TT, UK  
Email: m.d.ryan@cs.bham.ac.uk  
Phone: +44 121 414-7361  
Fax: +44 121 414-4281

**Stephan Reiff-Marganiec**  
Department of Computer Science  
University of Leicester  
University Road  
Leicester LE1 7RH, UK  
Email: srm13@le.ac.uk  
Phone: +44 0116 252-2603  
Fax: +44 0116 252-3604

### Social Programme

The Conference Banquet will be held at the National Space Centre giving the opportunity to before to explore the space centre's galleries. The National Space Centre won national Specialist Visitor Attraction of the year award in 2003 and provides a spectacular voyage of space and man's attempts to understand and traverse it. The centre is also a research base for University staff from our Space Research Centre and was mission control base for the UK's first mission to another planet: the Beagle 2 Mars Probe.
